

Q1. Which processor is based on a 3nm architecture and is commonly used in latest premium smartphones?

- A. Snapdragon 8 Gen 2
- B. Apple A17 Pro
- C. MediaTek Dimensity 9200
- D. Exynos 2200

Answer: B

Q2. A tablet requiring high GPU performance for video editing would benefit most from:

- A. Apple M1
- B. Snapdragon 7 Gen 1
- C. Intel Core i3-12100
- D. MediaTek Helio G85

Answer: A

Q3. Which processor is best suited for AI-driven tasks like on-device machine learning in smartphones?

- A. Snapdragon 8 Gen 3
- B. Intel Pentium Gold
- C. AMD Athlon 3000G
- D. Helio P35

Answer: A

Q4. If a desktop requires high multi-threaded performance for virtualization, which processor is most suitable?

- A. Intel Core i5-12400
- B. AMD Ryzen 9 7950X
- C. Apple A16 Bionic
- D. Snapdragon 778G

Answer: B

Q5. Which feature differentiates modern mobile processors like Apple A17 Pro from traditional desktop CPUs?

- A. Lack of GPU
- B. Integrated Neural Engine
- C. Absence of cache memory
- D. No support for multitasking

Answer: B

Q6. A user wants a tablet that can replace a laptop for coding and multitasking. Which processor is most appropriate?

- A. Apple M2
- B. Snapdragon 680
- C. Helio G37
- D. Exynos 850

Answer: A

Q7. Which of the following processors uses ARM architecture but is designed for desktops/laptops?

- A. Intel Core i7-13700K

- B. AMD Ryzen 5 5600X
- C. Apple M3
- D. Intel Xeon E5

Answer: C

Q8. Which scenario best justifies choosing Snapdragon 8 Gen 3 over a desktop CPU?

- A. Running heavy virtualization
- B. High-end gaming on mobile with power efficiency
- C. Data center workloads
- D. Large-scale database processing

Answer: B

Q9. Which processor is likely to deliver better battery efficiency in mobile devices?

- A. Intel Core i9-13900K
- B. AMD Ryzen 7 7700X
- C. Apple A16 Bionic
- D. Intel Xeon Gold

Answer: C

Q10. If a developer wants to test cross-platform apps (mobile + desktop ARM), which processor ecosystem is most suitable?

- A. Intel Core series
- B. AMD Ryzen series
- C. Apple Silicon (M-series)
- D. Pentium series

Answer: C
